

Demonstration of Proposed Features

Date	2 July 2026
Team ID	XXXXXX
Project Name	Flood Prediction
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Weather Data Input	Allows users to enter weather parameters such as rainfall, cloud visibility, and seasonal rainfall through the web application.	Implemented	Yes	Successfully accepts user input.
2	Data Preprocessing	Cleans and prepares the input data before sending it to the prediction model.	Implemented	Yes	Improves prediction accuracy.
3	Machine Learning Prediction	Uses Decision Tree, Random Forest, KNN, and XGBoost to predict flood occurrence.	Implemented	Yes	XGBoost achieved 96.55% accuracy .
4	Prediction Result Display	Displays flood prediction results (Flood / No Flood or Risk Level) through the Flask web application.	Implemented	Yes	Results shown instantly on the web page.
5	Model Comparison	Compares the performance of multiple machine learning algorithms to select the best model.	Implemented	Yes	XGBoost selected as the best-performing model.
6	IBM Cloud Deployment Support	Application architecture supports deployment on IBM Cloud for future scalability and accessibility	Partial (or Implemented if deployed)	No (or Yes if deployed)	Planned for cloud deployment.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	5 (or 6 if IBM Cloud deployment is completed)
Total Features Demonstrated	5 (or 6 if deployed and demonstrated)
Overall Implementation Rate (%)	83.33% (or 100% if all six features are completed)
