

Brainstorming & Idea Prioritization Template

Date	2 july 2026
Team ID	xxxxxx
Project Name	Flood prediction
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Idea / Suggestion	Category	Group No.
1	Weather data analysis for flood prediction	Machine Learning	1
2	Compare Decision Tree, Random Forest, KNN, and XGBoost models to identify the best-performing algorithm.	Model Development	1
3	Create a Flask web application for users to enter weather parameters and receive flood predictions.	Web Application	1
4	Deploy the application on IBM Cloud for remote accessibility and scalability.	Cloud Deployment	1

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Machine Learning based flood prediction using weather data	High	High		YES
2	Web application for	High	High		YES
