Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "We need accurate flood predictions to issue early warnings." • "Timely information helps us flood protect lives and property." • "The prediction system should be easy to use and reliable."	THINKS • "Can I trust the prediction results during heavy rainfall?" • ☐ "How quickly can I receive flood risk information?"
DOES • "We need accurate flood predictions to issue early warnings." • "Timely information helps us protect lives and property." • "The prediction system should be easy to use and reliable."	PERSONA NAME Disaster Management Officer FEELS • ☐ Concerned about the safety of people in flood-prone areas. ☐ Responsible for making quick and accurate decisions. ☐ Confident and relieved when reliable flood predictions are available.
